Dear

REPLACEMENT OF ENDEAVOUR ENERGY POLE No

I wish to advise that the Endeavour Energy pole located on your property, to which your switchboard is attached, requires replacement.

In accordance with the Service and Installation Rules of NSW, the mounting of switchboards with the associated metering equipment on the distributor's (Endeavour Energy) pole is now not accepted. In view of this, Endeavour Energy will rectify historical situations as poles are found to require replacement. There will be no charge to you for this work.

To rectify the situation on your property and to meet the requirements of the Service and Installation Rules of NSW, a new pole (approximately two (2) metres above ground) will be installed to support your existing switchboard.

The replacement Endeavour Energy pole will be located approximately metres from the existing pole such that a suitable work space is provided for any future maintenance activity.

Could you please acknowledge (your details and signature below) the replacement of Pole..... in the immediate vicinity of the existing pole is acceptable to you along with the understanding that all costs for this work will be borne by Endeavour Energy and that the ownership and any ongoing maintenance requirements for the switchboard and pole will be your responsibility.

If you have any concerns with the proposed works please contact the Operations Manager, Mr..... at the local Field Service Centre, on
