------------------------	---

SMI 161 Replacement criteria for major primary system assets

SECTION 9 – AUTHORITIES, RESPONSIBILITY AND DOCUMENT CONTROL

Contents

9.1	Authorities and Responsibility	2
9.2	Document Control.....	2

9.1 Authorities and Responsibility

Chief Engineer has the authority and responsibility for:

- approving this standard; and
- approving asset replacement and refurbishment requirements, including the approval of change requests.

Manager Primary Systems has the authority and responsibility for:

- implementing the condition assessment of primary system assets nominated by regions and other stakeholders for replacement;
- developing asset management strategies for assets in poor condition;
- developing Statement of Asset Need (SAN) for replacement of primary system assets;
- reviewing of all primary system asset related risk assessments for each replacement/refurbishment proposal; and
- endorsing all primary system assets related replacement and refurbishment proposals.

Network Investment Planning Manager has the authority and responsibility for developing the business case for an asset's renewal based on the Statement of Asset Need (SAN)

Regional Managers have the authority and responsibility for:

- identifying asset renewal needs within their regions; and
- implementing any recommendations from the risk assessment.

9.2 Document control

Documentation content coordinator: Network Maintenance Manager,

Documentation process coordinator: Standards Process Coordinator
